Hi Beata!

I live in north western Canada. I happened on to one of your videos on U Tube, and then checked out a few more, plus your website. I have to say I'm very impressed with your style and delivery. There are many videos on U Tube and as you know, not all of them good ones. Yours stood out with a very clean, smooth and easy to follow approach that is quite refreshing. You have an unpretentious energy that focus's beautifully on a lot of very important key elements in dance, and that is most effective for the viewer - the end result is very professional and dignified. If I may be so bold, you have delightfully appealing form and function. :)

We have a small, very humble dance group here and being quite isolated, we constantly starve for good contact in the dance world. It is inspiring to take in your well delivered instructional videos which are loaded with great observations and sound advice. ;)

You should know that people like yourself make a huge difference to a lot of regular people out there struggling to improve their social dance skills – you have achieved an admirable level of expertise in dance – well done, and keep up the good work! B)
